Title of your paper

Your Name *

April 10, 2013

Abstract

Add abstract here. Try to be complete, though it is likely that you will change this during the term.

1 Introduction

Write as much of a tentative introduction as you wish. Of course, you will modify this later. But include at least a two paragraphs and an indication of what will come in the rest of your paper.

I want to see at least one theorem statement, at least one displayed and numbered equation, and at least one reference somewhere in this document. Put it here or in one of the sections before. You could add a sentence of text as well, but I don’t care. Otherwise the sections may be empty. Check the silly example sample.tex on the web page to see how to format equations and use labels.

Fill in the section titles to fit your paper. (Everything is subject to change.) End with at least one reference. There are different formats used by different journals, but pick any one you like.
